

Nguyen Truong Sang

.NET Developer

Graduated with a degree in Software Engineering and possessing practical experience building full-stack web applications using ASP.NET Core, ReactJS, and PostgreSQL. Passionate about backend and full-stack development, with experience in RESTful APIs, database design, mobile-friendly UI development, and cloud deployment. Familiar with using AI-assisted tools to support debugging, refactoring, and improving development productivity.

Profile

- 0969822466
- DoB 20/07/2004
- truongsang2072004@gmail.com
- <https://github.com/sang274>
- Dormitory area B - Ho Chi Minh City National University, Dong Hoa, Di An, Binh Duong

Skills

Programming Languages: C#, Java, SQL
Backend: ASP.NET Core, REST API, Entity Framework Core
Frontend: ReactJS, NextJS, JavaScript, HTML, CSS
Database: SQL Server, PostgreSQL
Desktop Development: Windows Forms WinForms)
Concepts: OOP, MVC, Clean Architecture
Tools & Platforms: Git, GitHub, GitLab, Postman, Swagger, Docker, Azure, Vercel

Certifications

Spring2023

ACADEMIC PREPARATORY ENGLISH TRS601 - English 6

Work experience

FPT SOFTWARE | 1/2025 - 4/2025

Intern

Developed RESTful APIs using ASP.NET Core for attendance and payroll features
Designed and optimized PostgreSQL queries and database schema
Collaborated with a Scrum team using Gitlab and Agile workflow
Participated in bug fixing, API testing, and feature implementation

Education

FPT UNIVERSITY | 2022 - 2026

Major: Software Engineering
Academic classification: Good

LANGUAGE

English	Intermediate
Vietnamese	Expert
Japanese	Basic

Projects

Smart Driving Learning System | 1/2026 - 5/2026

Back-End Developer, Front-End Developer

Developed a full-stack web-based learning platform for driving license exam preparation using ASP.NET Core, ReactJS, and PostgreSQL.

- Built RESTful APIs for mock exams, learning progress tracking, forum discussions, questions, simulation, and report management
- Implemented AI-assisted learning path and driving simulation exam features
- Designed and managed PostgreSQL database with role-based authentication and authorization
- Deployed frontend on Vercel and backend services on Azure
- Implemented JWT authentication and role-based authorization

Anime Sales Website | 9/2025 - 12/2025

Back-End Developer, Front-End Developer

Developed a full-stack e-commerce web application for buying and selling anime-related products using ASP.NET Core, NextJS, and PostgreSQL.

- Implemented product management, shopping cart, order tracking, and secure checkout functionalities
- Built RESTful APIs for product browsing, authentication, and order processing
- Designed responsive user interfaces and integrated role-based access control
- Collaborated with team members using Git and Agile development workflow
- Implemented JWT authentication and role-based authorization
- Applied Clean Architecture pattern in backend development

Koi Show Management System | 9/2024 - 12/2024

Back-End Developer

Developed a web-based management system for organizing koi fish competitions and exhibitions using ASP.NET Core and SQL Server.

- Implemented features for event management, participant registration, koi evaluation, scoring, and ranking
- Developed RESTful APIs and database schema for competition data management
- Built role-based functionalities for organizers, judges, and participants
- Collaborated with team members in designing and implementing backend services
- Implemented JWT authentication and role-based authorization
